# About Future of AI

Since 2018, Future of AI has brought together 5,000+ AI & data leaders from Israel & around the world, becoming Israel's leading international event series on AI & data. Our events bring together thought leaders and decision makers from the AI & data community - from big tech companies, business organizations, startups, investment funds, academia and government.

Future of AI attendees come to our events to gain knowledge and insights on the latest trends in AI & data, learn about specific solutions, meet industry peers, make new connections, and even gain hands-on experience in our workshops and hackathons. Our events present unique opportunities to share knowledge and meet potential clients, vendors, partners, investors, and employees.

We're super excited for our 2022 Annual Summit which will follow the success of our previous annual summits. During the last two years we've organized six virtual and hybrid intimate events - and this will be our first major event since Covid hit. We invite you to join this one-of-a-kind opportunity that might be just what your business needs.

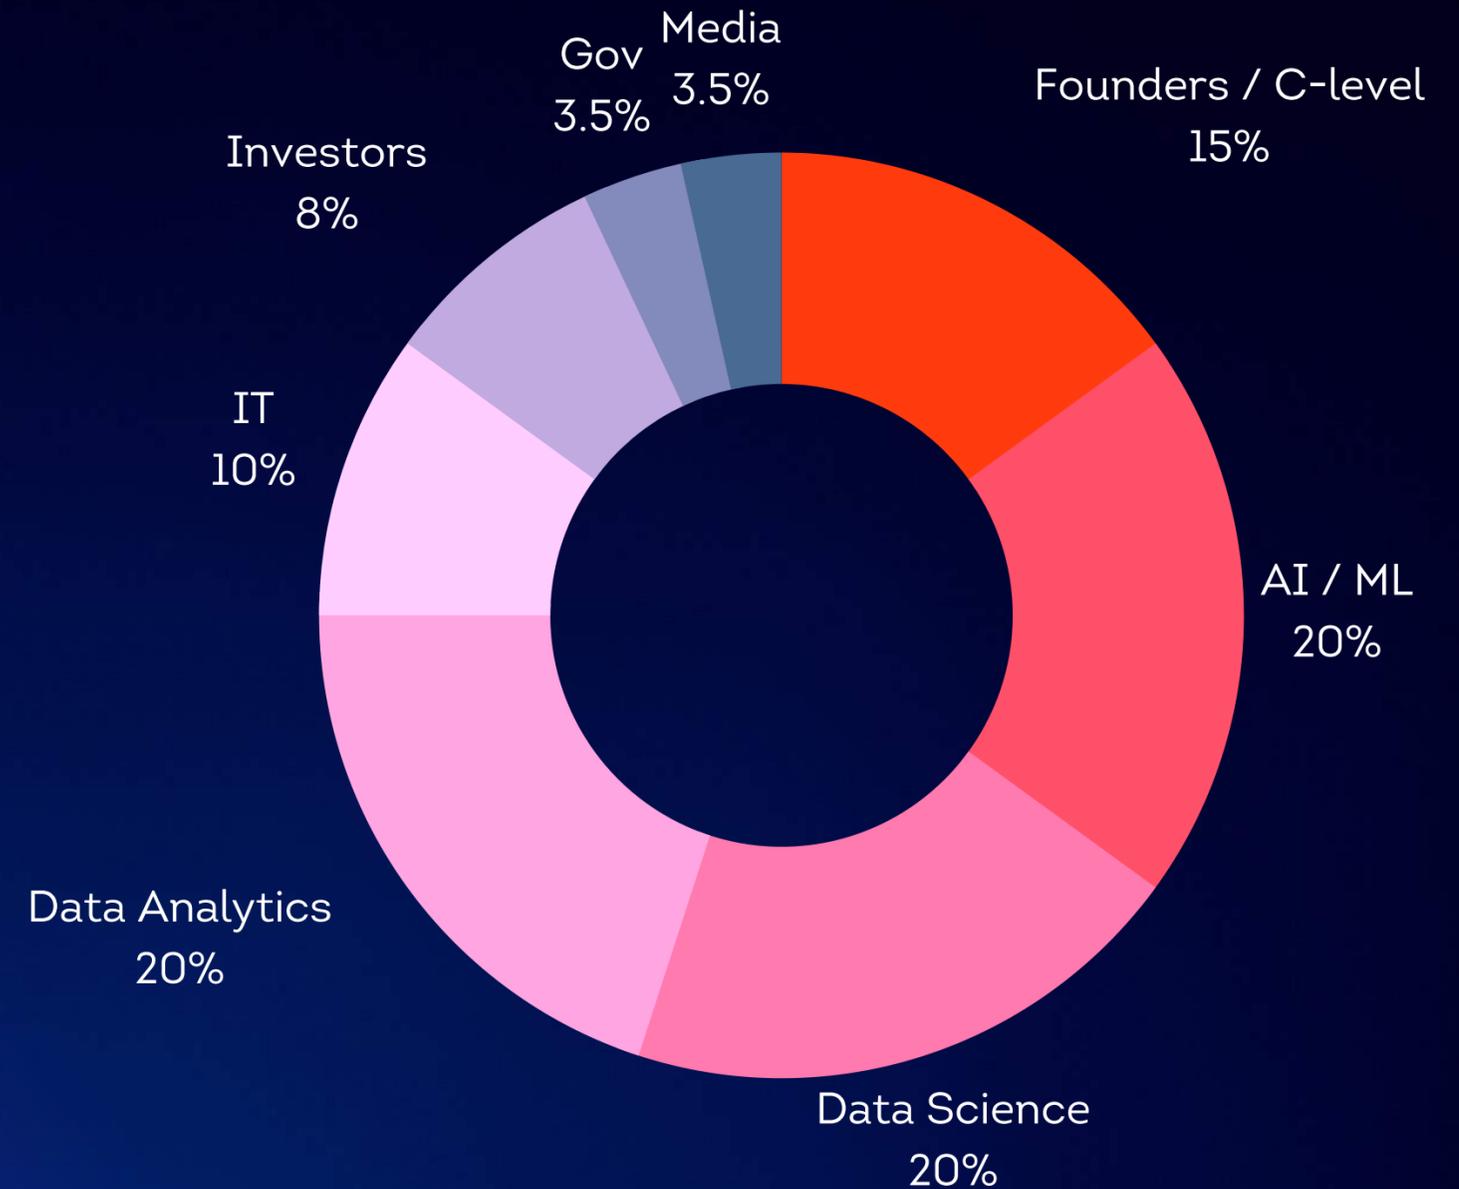

The Future of AI Team  
at People & Computers

# Who is going to be there?

Future of AI is attended by tech leaders, decision makers, and junior professionals in AI & data roles. Our attendees come from all types and sizes of organizations, big and small, private and public, from a range of industries, including finance, retail, tech, and more.

On average, 80% of our attendees are based in Israel. Many of them, however, work for global companies serving clients and employing teams all over the world. 20% of our audience is based globally, mostly in Europe. Our events are the place to meet the AI & data community!
